Dear Sir:

This Request is being submitting to add an inventor in the above-identified patent application, pursuant to 37 CFR § 1.48(c). The application was originally filed with 5 claims naming Frank E. Johnson as the sole inventor. The addition of inventorship is necessitated by a response to an Office Action filed December 5, 2003, wherein new claims were entered that disclose subject matter for which Robert Ogdon is also an inventor. Accordingly, please add the following as an inventor of the application:

02/27/2004 CCHAU1 00000153 09624902 Robert H. Ogdon
01 FC:1460 130.00 OP 3 Golden Eagle Lane
Littleton, Colorado 80127

Attached are:

- (1) a statement from Robert H. Ogdon indicating that the error in inventorship occurred without deceptive intent on his part (37 CFR § 1.48(c)(2));
- (2) a declaration by each of the actual inventors, Frank E. Johnson and Robert H. Ogdon, as required by 37 CFR § 1.63 (37 CFR § 1.48(c)(3)); and
- (3) written consent from InterCall, Inc., the assignee of the present invention (37 CFR § 1.48(c)(5)).

Pursuant to 37 CFR § 1.17(i), a check in the amount of \$130.00 is enclosed (37 CFR § 1.48(c)(4)). The Commissioner is hereby authorized to charge our Deposit Account No. 19-1970 for any fee deficiencies associated with the filing of this paper.

Respectfully submitted,

SHERIDAN ROSS P.C.

37 CFR §1.56(a) and (b)
DUTY TO DISCLOSE INFORMATION MATERIAL
TO PATENTABILITY

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is cancelled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is cancelled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine:

(1) prior art cited in search reports of a foreign patent office in a counterpart application, and

(2) the closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentably defines, to make sure that any material information contained therein is disclosed to the Office.

(b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and

(1) It establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim; or

(2) It refutes, or is inconsistent with, a position the applicant takes in:

(i) Opposing an argument of unpatentability relied on by the Office, or

(ii) Asserting an argument of a patentability.

A prima facie case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.*

*Note, 37 CFR §1.97(h) states: "The filing of an information disclosure statement shall not be construed to be an admission that the information cited in the statement is, or is considered to be, material to patentability as defined in §1.56(b)."
